细致入微，关怀备至 为医院场所量身定制

考虑到医院的特殊性，康力医用电梯在功能上进行了特别设计，使老人、孩子和病人更有安全感。

轿厢空间：1.4米*2.4米*2.4米的超大轿厢空间，超大容量，让担架出入自如。

轿厢材料：全绿色材质，无异味，无污染。

残疾人用梯功能（选配）：为残疾人呼梯需求，延长开门时间，给予方便。

语音报站（选配）：语音提示，为盲人患者和老年听力不便者提供帮助。

厅门设计：旁开式、中分式、前后贯通式三种不同厅门设计，满足医院不同建筑结构需求。

LED 照明

暖光色调

4.0 加粗加大型数字显示

延长开门时间

超大
轿厢空间

1.4x2.4x2.4米

扶手设计

细腻光滑圆形扶手，仿人体工程结构，完美贴合手臂曲线，舒适、安然。

Design of handrail

The fine and smooth round handrail, the engineering structure imitating the human body, and the curve perfectly fitting the arms, render the comfortable and secure feelings.

净化通风

特殊的通风设计，有效净化空气。

Purification and ventilation

The special design of ventilation, effectively purifies the air.

键面按钮

凹凸有致键盘式按键按钮，便于盲人感应，反应更灵敏。

Key buttons

The key buttons like keyboard with concave and convex is convenient for the blind to sense and makes the reaction more sensitive

按钮高度

采用最科学的人体身高标准设计安装，举手之间轻松上下。

Height of the buttons

It adopts the most scientific human height standards for the design and installation, which makes it more easy and convenient to raise the hands for operations.

延长
延时关门

安然平稳，安全可靠

营造生命温暖空间

- ◆自动显示故障信息，提高维修效率；自动存档30次故障信息，便于掌握详情，排除故障。
- ◆电磁兼容性，可有效避免医疗仪器与电梯信号的电磁波干扰，满足现代医疗系统需求。
- ◆128道红外光束密集分布，可灵敏地探测到任何进入区域的异物，防止夹伤或撞伤。
- ◆维持电梯较长时间开启状态，延长延时关门，满足医护人员与病患安全出入。（选配）
- ◆电梯应急装置，当电梯停电或故障停止，快速切换至低速运行至平层位置，停稳后开门疏散乘客。（选配）

30 次

自动存档故障信息

128 道

密集的红外光束

应急装置

Secure and stable, safe and reliable

Creating the warm space for life

- ◆ It can automatically display the information of the breakdowns improve the efficiency of maintenance. Besides, it can automatically save the information of 30 breakdowns, thus facilitating the mastering of the details and clearing the trouble.
- ◆ It has electromagnetic compatibility, which can effectively avoid the electromagnetic wave interference of the medical instruments and elevator signals, thus meeting the demand of the modern medical system.
- ◆ There is the intensive distribution of 128 rays of infrared beams, which can probe any foreign matter entering the region in a readywitted manner and avoid injuries of pressing or colliding.
- ◆ It can maintain the on-state of the elevators for a relatively long period of time and lengthen the time of closing the gate, thus meeting the requirement of the medical care personal and the patients for safety in and out. (Optional)
- ◆ It has the elevator emergency device so that when the elevator powers off or the breakdown of the elevator stops, it can rapidly switch to the low-speed operation and move to the position of the leveling, thus evacuating the passengers after opening the gate while stopping stably. (Optional)

VVVF门机系统，灵敏调节每层开关速度，确保梯门的流畅和宁静。

The VWF door-motor system can sensitively adjust the opening and closing speed of each floor, thus guaranteeing the smoothness and tranquility of the elevator gate.

节能低耗，清新自然 迸发无限绿色活力

康力医用电梯选用高科技绿色环保轿厢型材，采用世界领先的先进绿色技术，创造与医用环境和谐统一，清洁明亮的医用空间。

- ◆ 新一代永磁同步无齿轮曳引机，可节省能源40%之多，无需更换油脂，宁静清爽。
- ◆ 配置轿厢照明和轿厢风扇自动关闭功能，体现了康力电梯的人性化设计和绿色能源理念。

40%↑
节省能源

自动关闭功能

Energy-saving, low-consumption, fresh and natural Bursting out infinite green vigor

Canny Hospital Elevator selects the high-tech green pro-environmental lift car materials, adopts the world leading advanced green technology, and creates the harmonious unification with the medical environment as well as the clean and bright medical space.

- ◆ It has the new-generation permanent magnet synchronous gearless machine, which can save 40% of the energies without bothering the change of grease, thus providing the tranquil and fresh atmosphere.
- ◆ It is equipped with the lift car illuminating and automatically closing functions, which reflects the personalized design and green energy ideas of Canny Elevator.

降低 **30%**

能量回馈系统（选配）

通过能量回馈器变换的再生电能供医院照明系统、医用等其他用电设备使用，能量消耗降低30%。

Energy feedback system (optional)

The renewable energy converted from the energy feedback device can be used for other electricity-consumption devices, such as the illuminating system and the medical devices, which can decrease the energy consumption by 30%.

全系LED轿厢照明系统，耗电量仅为普通荧光灯的1/5，提供自然明亮好环境。

The Fully Systematic LED Lift Car Illuminating System, whose power consumption is just 1/5 of the ordinary fluorescent lamp, thus providing the naturally bright and great environment.

标准型设计

Standardized design

标配轿厢装饰配置

Standard configuration of the lift car decoration

轿厢内壁采用不锈钢包边立柱和不锈钢踢脚线，与高品质板材完美组合，更显稳重大方气质。

The inner wall of the lift car adopts the stainless steel overlapping uprights and the stainless steel skirting lines, which can be perfectly combined with the high-quality panel materials, thus further highlighting the stable and generous atmosphere.

先进功能设计

Advanced function design

● 标准功能；Standard optional

● 抱闸力检测 Braking Force Self-Detecting

主动定期测试抱闸力，通过提示故障及禁止电梯运行等方式，防止严重事故发生。
Actively and regularly test the brake force; prevent more serious accident by means of malfunction indication and running prohibition and so on.

● 曳引绳滑动检测 Traction Rope Slide Detection

实时监测滑动数据并目根据需要自动进入应急减速的安全运行模式。
It provides real-time monitoring of sliding data, and can automatically enter the safe operation mode for emergency according to requirements.

● 抱闸检测保护 Braking detection protection

通过抱闸臂检测开关对抱闸的打开与闭合实时监测。当抱闸未按要求打开时，系统将禁止电梯启动。
Brake arm detection switch executes real-time monitor to brake opening / closing. If the brake does not open by the requirements, the system will not start the elevator.

● 门区外不能开门的保护 Protection of none door opening outside door zone

在非门区状态，禁止自动开门。
Automatic door opening is forbidden under none door zone condition.

● 低速保护 Low-speed protection

为防止电梯在控制范围外低速运行导致安全问题而设置的保护。
It prevents elevator from low-speed running outside the control range causing any safety problem(s).

● 超载保护 Overload protection

在电梯关门运行前，当检测到超载信号时，电梯不能关门运行，并且关门按钮无效。超载消除后自动恢复正常。
Before the elevator shuts the door, if it detects overload signal, the elevator does not shut then, "door-shut button" becomes effective. After it removes overload problem, it re-starts automatically.

● 故障自动靠站 Automatic parking in trouble

正常运行中的电梯因故障在非平层区域内停止时，只要不是安全装置动作而引起，则电梯以低速向中间楼层方向进行自救运行，并在最近服务层停层开门，以防止困人事故的发生。
When the elevator stops in none leveling zone due to any trouble, if it is not caused by safety device action, it executes self-rescue running towards the middle floor direction at low speed. It parks and opens the door at the nearest service floor to prevent from any trapping accident.

● 电梯受阻保护 Protection of elevator blockage

系统发出启动命令，但在预定的时间内未能正常启动，或电梯在运行，但在预定的时间内未能到达一定的距离，电梯停止运行。
When the system runs start command, it does not start within preset time nor because it is during the elevator travelling, and it does not reach certain distance within preset time as well, the elevator stops accordingly.

● 有司机运行 Attendant running

电梯工作在司机状态，系统按轿内指令信号运行。如有层站召唤信号，顺向层站召唤自动截车。平层停车后自动开门，但不自动关门，需由司机按动关门按钮。
When it is under the operator condition, the elevator system operates according to the car command signal. If landing call signal is available, it automatically cuts as per forward landing call. The door opens automatically after the leveling parking. But it does not shut automatically until the operator presses "door closing button".

● 消防返回 Fire-fighting return

消防开关闭合后系统进入消防返回状态，系统将消除所有层站召唤和轿内指令信号，自动返回消防基站，保持开门。如电梯正在反方向运行，则就近层停车不开门返回消防基站，保持开门。
After the fire-fighting switch closes, the system enters into fire-fighting running. The system will remove all the landing calling and car command signals, and it automatically return to fire-fighting home landing, and the door keeps open. If the elevator is traveling reversely, it parks at nearby floor, and returns to fire-fighting home landing with the door keeping closed, after that it keeps the door open.

● 基站锁梯 Home landing elevator locking

电梯处于自动状态，关闭基站锁梯开关后，电梯将所登记的轿内指令服务完毕后自动返回基站，电梯进入驻停状态。一旦打开锁梯开关，电梯会立即退出驻停状态，投入正常运行。
When the elevator is under automatic condition, after it shuts home landing locking switch, the elevator will complete all the registered car command services, automatically return to home landing, if it enters into parking condition. As soon as locking switch opens, it immediately exits from parking condition and throws into normal running.

● 误登记取消 Cancel the error-register

若乘客误按了某层轿内指令按钮并已登记（轿内指令灯亮），则在电梯未运行状态下，只需再按一次该层轿内指令按钮即将该登记取消（轿内指令灯灭）。
If the passenger presses the car command button at certain floor and has registered it by mistake, (by then the car indicating lamp is bright), under the condition of none elevator running, you only require to press the car command button at the same floor to cancel the register. (By then the car indicating lamp dies out.)

● 通电自动开门 Electrified automatic door-opening

每次电梯上电，如轿厢正在门区，电梯门将自动打开。
Every time when the elevator is electrified, if the car is in the door zone, the elevator door opens automatically.

● 轿厢内照明及风扇自动停止 Automatic stop of the car lighting and fan

如一定时间电梯无人使用，轿厢内照明和风扇将自动关闭。接到任何层站召唤命令后自动打开。
If nobody uses the elevator within certain period of time, the car illumination and fan shut off automatically and re-opens on receiving any landing call command(s).

先进功能设计

Advanced function design

● 标准功能；Standard ● 无偿选配；Free optional ● 有偿选配；charged optional

● 楼层信号自动校正 Automatic correction of floor signal

如果楼层显示位置有误差，系统在运行中检测到端站开关后，将自动校正楼层显示。
If the floor display position has error, after the system detects terminal switch in the travel, it will automatically correct the floor display.

● 轿内反向指令消除 Cancel reverse command(s) in the car

当电梯运行至最远端楼层换速时，清除所有的轿内指令登记。
When the elevator travels to the farthest floor and changes the speed, it removes all the car command register.

● 呼梯按钮嵌入自诊断 Self-diagnostic embedded calling button

若某一层站召唤按钮按下时间超过20秒而未断开，则系统认为该按钮嵌入。以后对该层层站召唤不予登记，且该按钮对应的应答灯不断闪烁报警。当该按钮断开时，退出上述状态。
If you press call button at certain landing for over 20 second, and it still does not disconnect, the system assumes that it is embedded button. It does not register the landing call of the same floor afterwards. Responsive lamp which corresponds to the button keeps flickering and alarming. When the button disconnects, it exits from above condition.

● 自动返基站 Automatic return to home landing

无司机运行时，如果自动返基站功能设置有效，当无层站召唤信号时间到达预定的时间后，电梯自动返回基站。
In no-operator running, if automatic return function to home landing is still effective, when no-landing calling signal time fulfills preset time, the elevator returns to home landing automatically.

● 消防运行 Fire-fighting running

消防开关闭合后系统进入消防运行：系统将消除所有层站召唤和轿内指令信号，自动返回消防基站，保持开门。如电梯正在反方向运行，则就近层停车不开门返回消防基站，保持开门并由消防员控制运行。
When the fire-fighting switch closes, the system enters into fire-fighting running. The system will remove all the landing calls and car command signals, and it automatically returns to fire-fighting home landing, and the door keeps open. If the elevator is travelling in reverse direction, it parks at nearby floor, and returns to fire-fighting home.

● 轿厢到站钟 Car arrival gong

通过轿厢顶的钟声，提醒在轿厢内的乘客和等候在电梯候梯厅内的乘客该电梯即将到站。
Arrival gong on top of the car reminds the passengers in the car and those waiting in the hall that the elevator has arrived.

● 语音报站 Phonic station reporter

由语音报站装置通知乘客电梯运行相关信息：在电梯到站前播报将要到站的层楼，在关门运行前播报将要运行的方向等。
Phonic station reporter informs the passengers of the relevant elevator running information. It announces the arriving landing, the traveling direction etc. before door-close and running.

● 再平层功能 Re-leveling function

电梯停在当前层，当过多乘客进入电梯或离开电梯时，由于钢丝绳的伸长或缩短，轿厢脱离平层区域，电梯将在开门的情况下以低速运行至平层位置。
If the elevator parks on the current floor, when too many passengers enter into / leave the elevator, the car is separated from the leveling zone because of wire rope extension or shortening. The elevator will then travel to the leveling position at low speed under the condition of door-opening.

● 信号接口装置 Signal interface position

通过信号接口装置输出电梯的基本运行状态信号。
It outputs basic running condition signal through the signal interface device.

● 自动应急平层运行 Automatic emergency leveling travel

如果自动应急平层功能设置有效，并配置了“自动应急平层装置”，满足自动应急平层条件，电网停电后由电梯自动应急平层装置供电运行到达最近层站的平层位置，开门，让乘客安全撤离轿厢。
If automatic emergency leveling function setting is effective, it is equipped with "automatic emergency leveling device" to satisfy automatic emergency leveling conditions. After power grid falls, automatic emergency leveling device supplies electricity and the elevator travels to the leveling position of the nearest landing. It opens the door, for safe evacuation of the passengers from the car.

● 远程监控 Long-distance monitor

通过信号接口装置，及无线网络技术，用户只需登入相应服务器即可查看信息，对电梯故障率、故障时间等进行统计分析也可实现故障短信报警。
Through signal interface device and wireless network technology, user can log in the corresponding server to check information, make statistical analysis of elevator failure rate and failure time, and achieve fault message alarm.

● 能量回馈 Energy feedback

当配置了能量回馈装置时，将电梯轻载上行和重载下行时产生的能量回馈电网或供周边设备使用，以达到节能目的。
When energy feedback device is installed, the energy produced during the elevator light-load up-motion and heavy-load down-motion will be used by power grid and the surrounding equipments. It fulfills the energy-saving purposes.

● 电动松闸 Elecctric brake release

非平衡状态下，无机房电梯，电动松闸慢速溜车，进入门区后自动报警，手动开门救援。
Under the non-balancing conditions, Machine Roomless elevator, It automatically alarms after entering into the door zone with the manual door-open aid.

注：“电动松闸”为KWL无机房医用电梯的功能。

Note: Electric brake release for KWL machine roomless hospital elevator.

用户应完成的工作

- 1、本图按有关电梯技术标准要求绘制，需复核后作为电梯安装依据。
- 2、机房内通向井道的所有孔洞四周应筑一高50mm以上，宽度适当的台阶。
- 3、曳引机承重梁如需埋入墙内，则支承长度应超过墙中心20mm，且不应小于75mm。
- 4、安装完成后，地面装饰应与厅门地坎上表面有一高度适当的台阶，以防止水或其它杂物进入井道。
- 5、安装时浇灌的物体应能满足相关图示要求。
- 6、缓冲器底座制作时应在安装人员的指导下施工。

The user's tasks

1. It makes the drawing according to the relevant lift technical standard, It needs to be checked and confirmed by the user before it becomes the lift installation proof.
2. It shall have one above 50mm step with the proper width around the holes that lead to the well in side the machine room.
3. It shall be embedded in the wall for the machine supporting beam of the traction machine, Then the supporting length shall be 20mm more than the wall center, It shall not be less than 75mm.
4. After the installation completion, the ground decoration shall have a proper height step in the sill surface to prevent water or other impurity from entering into the well.
5. The casting object in the installation shall satisfy the relevant drawing requirements.
6. The buffer base shall be made under the directions of the installers.
