

StiltzTM
The home lift company

The **home lift**
that fits into
your life

www.stiltz.co.uk

The **Stiltz Home Lift**

is a real, through-floor lift that's specially designed to fit into your home. Already popular in Australia, it's the first lift of its kind available in the UK.

Developed to make your life easier, our lift helps you stay in your home when the stairs get too much. Compared with the cost and inconvenience of moving home, a Stiltz Home Lift really is cost-effective.

Unlike a stair lift, the Stiltz Home Lift carries two people comfortably, and you can even fit in the vacuum cleaner, and the family pet as well!

More than just a domestic lift, the Stiltz Home Lift will enhance your home

The Stiltz Home Lift is a prestigiously designed through-floor lift providing home access for those in need of a safe, discreet and compact alternative to stairs.

With twenty eight-years' experience in technological development and prototype improvement, Stiltz lifts are now a leading brand helping to keep people in their homes for longer, at an affordable price. Because Stiltz Home Lifts don't need fixing to walls or floors, your lift can be fitted virtually anywhere in your home, with no major building work, disruption or difficulties.

Compared with the cost and inconvenience of moving home, a Stiltz Home Lift really is a cost-effective investment that will add value to your home.

An easy, adaptable solution that complements your lifestyle

The Stiltz home lift is the original and first standing through floor lift on the market, with aesthetic and mechanical features that are unique and innovative.

- **Self-supporting structure** - unique dual rail structure does not require load-bearing walls
- **Self-contained drive mechanism** - no need for external power packs
- **Small footprint** - covers just 0.62 m² surface area
- **Plugs into normal 13 amp power socket** - like all other household appliances
- **Versatile placement and fitting** - Our range of models can be positioned anywhere in the home
- **Quieter than any other through floor lift available**

Change your life quickly and easily

Stiltz home lifts do not need fixing to a wall, your lift can be fitted virtually anywhere in your home with minimal disruption, no major building work and inconvenience – enabling you to get on with your life.

Compact and quiet

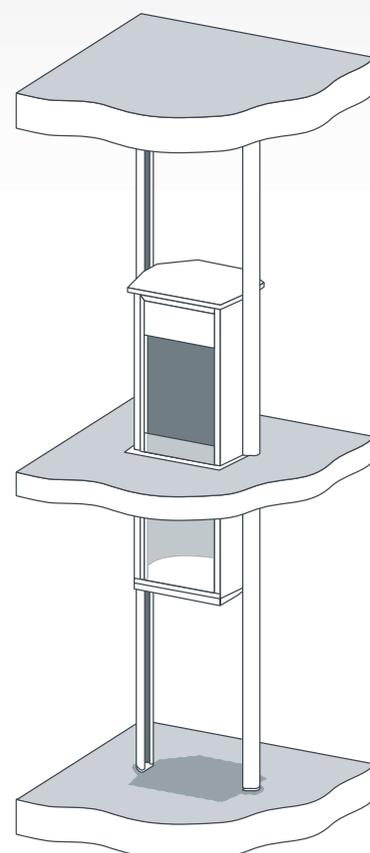

Our home lift is extremely quiet and compact – taking up an area of just 0.62m². It has the smallest footprint for a residential lift on the market. Because Stiltz don't use hydraulics, our lifts are as quiet as can be.

To give you an idea of the size of a Stiltz lift, we'll send you a fold-out template, to place in your home and see where it will best fit.

An investment in your future

Compared with the cost and inconvenience of moving home, a Stiltz Home Lift really is cost-effective, and it is an investment that will add value too.

Unlike invasive alternatives like a stair lift or hydraulic lift, your home will still look and feel just as you want it.

Features of a Stiltz Lift

Standard Finishes

All Stiltz Lifts come with the standard finish. This finish is a cream exterior with a matching interior lining and door colour.

Safety Features

All of our safety features come as standard. Including the full height light curtain; top and bottom safety pans; overweight, over speed and out of balance sensors; hold to run controls and our unique fall arrest mechanism.

Half Height Door

Every Stiltz Lift is supplied with a half-height swing door. This door is interlocked and is made to match the finish of the particular lift.

Remote Controls

Supplied with every lift are two remote control units. These remotes allow a call / send feature. This means you can operate the lift without travelling in it yourself. Allowing the lift to be used as a dumbwaiter to move heavy or awkward items between floors.

Two-Year Warranty

All Stiltz Lifts carry a standard two-year parts and labour warranty.

Fold Down Seat

Usually attaching to the right hand side of the lift, the fold down seat is a popular option selected by customers for the short trip between floors. Folding down the seat allows delicate goods to be placed for travel between floors.

Internal LED Down Lights

These lights not only add an aesthetic value, they also make the user feel safe. The internal lights are programmed to turn on once the user has entered the lift. The lights remain on for the entire journey and then automatically turn off once the person has left the lift.

Interior Grab Rail

In addition to the hold to run control, a grab rail is available to offer increased security for the occupants of the lift. This is used predominantly to assist moving when entering or leaving the lift.

Typical Applications

Standard Retrofit

The basic retrofit is the most common scenario and why the product was conceived. Put simply, wherever the footprint of a Stiltz Lift can fit, it can be installed, because it is self contained and does not need additional space for hydraulics.

All that is required is the cutting and trimming of the appropriate aperture.

Void Application

This is a unique offering of a Stiltz Lift. Due to the self-supporting rail structure a Stiltz lift is capable of being effectively free standing. With just enough room within a turning stairwell, this application uses the dead space in the void to fit a home lift.

Cupboard to Cupboard

This application is another favourite with Stiltz clients. The small footprint and self contained drive unit of a Stiltz Lift actually allows the lift to be completely fitted in an airing cupboard or wardrobe on both floors.

Through Car

The through car or double entry lift, is where a Stiltz Lift adds another dimension. This model is the reason why we claim to be able to fit a lift anywhere. From time to time the situation arises where a lift requires two entrances.

Footprint

Full Width: 1040mm

Full Depth: 740mm

Technical Specifications

Models

Through Car / Double Entry – Due to the Stiltz Lift’s unique dual rail technology, we were able to develop a model that allows you to enter / exit the lift from both sides.

This extra entry adds to the applications where the Stiltz Lift can be fitted.

Trio – Almost identical to the standard model, but with a deeper lift car, the Trio gives extra space and can even take a standard wheelchair. The Trio dimensions are 1100mm deep x 1040mm wide.

Safety Features

- Full Height Light Curtain
- Non - Automatically Controlled
- Obstacle Sensing Covers
- Standby Power Supply to Lower
- Over Speed Detection
- All limits wired ‘Fail safe’
- Emergency Stop button
- Key Switch
- Extreme Limits (Power cut off)
